HIGHLIGHTS AND FEATURES OF THE PRODUCTS

Largo - Ultra High Performance Floors is a product range of high-quality rubber indoor / outdoor floors intended for variety of applications available in different sizes, thicknesses and designs. High impact absorbing capacity, noise-cancelling, non-toxic, weather resistant and durable over the years it has proven to be long-lasting.

Easy to maintain, extremely effective impact absorption for gym wight areas, heel resistance, anti-bacterial properties and a non-slip surface, curved edges surround the perimeter.

Reduces the effect of prolonged standing on the knees, hips, back and feet.

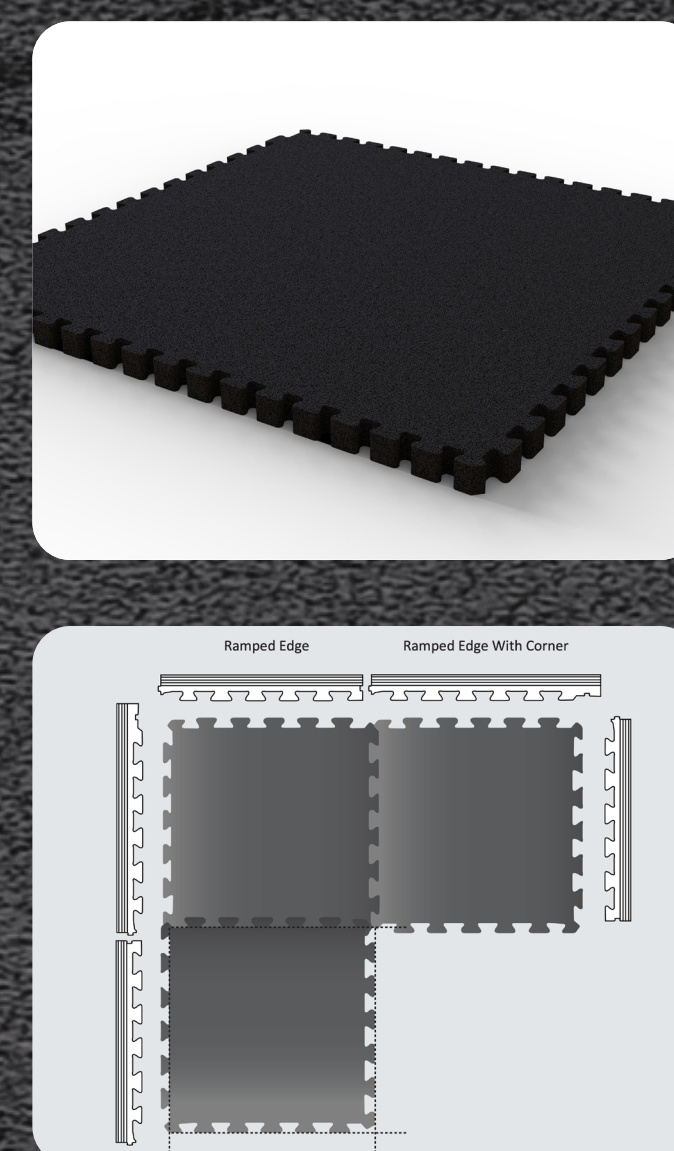

For more models or informations please be free to get in touch with our sales team.

INTERLOCKING RUBBER FLOORS / TILES

Largo Interlocking rubber tiles ensure that seams are virtually undetectable. This results in a uniform appearance on your floors. Rubber interlocking tiles can be easily installed over nearly any smooth surface including concrete, pavement, carpet, hard wood or tile. They are available in puzzle-style pieces that fit securely together, similar to jigsaw puzzles. The unique tab design securely tightens the tiles together without the use of expensive adhesives, tapes, or the guidance of a fitter.

For all interlocking rubber floors we have as well ramping edges available. These parts have been specifically designed to sit around the edge of pre-existing flooring products to enable easy access and to avoid stumbling.
